Art Unit: 1741

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the Specification:

Page 4, line 3: --Figs. 1A-1H,-- has been inserted after "comprising".

Page 4, line 6: --, comprising Figs. 2A-2L,-- has been inserted after "Figure 2".

In the Abstract:

Line 12 (applicant's numbering): "to the electrodes to create a first electric field of a sufficient" has been deleted.

Line 13: "strength between the electrodes and for a time sufficient" has been deleted.

Line 15: ", the electrically conductive structure being substantially aligned with" has been deleted.

Line 16: "the first electric field" and "applied to create a" have been deleted.

Line 17 has been deleted in its entirety.

Line 18: "'sufficient" and "between and in contact" have been deleted; a period has been placed after "structure".

Art Unit: 1741

Lines 19-21 have been deleted in their entirety.

These changes have been made to better describe the figures and to shorten the abstract to less than 150 words.

The prior art listed on the PTO 1449 submitted by applicant has been considered.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest a process for making an electric current rectifying device as recited in the instant claims. The claims in this application parallel those in parent application SN 09/061,818 now Patent No. 6,120,669 and distinguish from the prior art for the reasons given in that application. In this application the claims additionally recite that the process is for making an electric current rectifying device, that at least one semiconductor is placed into the environment capable of conducting electricity and containing electrodes, and that a step of reversing the polarity of the voltage applied to form a second electrically conductive structure between and in contact with a second of the substrate and the semiconductor is included. The additionally added limitations patentably distinguish the claims of this application from those of 09/061,818.

Art Unit: 1741

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
